INSECT NOTES FROM COSTA RICA IN 1936

C. H. Ballou
Chief of Entomological Section
National Agricultural School
San Pedro de Montes de Oca

This paper is a continuation of the supplements being published each year in the Insect Pest Survey Bulletin on the collection records made by C. H. Ballou. The previous publications are Supplements to No. 4, Vol. 15, 1935, and Supplement to No. 9, Vol. 15, 1936. The present paper does not include the entire collection records for the year, but only those giving additional data to the preceding lists. The plants are those from which the insects were collected and do not in all instances indicate the food plants. If the insect was feeding, the plant name is followed by "f" and if it was destroying the plant or ruining the crop, by "F".

Although a few localities new to the lists have been added, it is not thought practicable to reissue the map this year.

COLEOPTERA

Insect and locality

Collected on

Date and notes

ANTHICIDAE

Notoxus eximus Champ.

Paso Ancho

Cestrum lanatum
Cestrum macrophyllum
Coix mayuen
*Ficus carica**Linum usitatissimum*
Tournefortia foetidissima.*Trichilia havanensis*
Watsonia sp.

BRENTHIDAE

Brentus mexicanus Boh.

Paso Ancho

Cestrum nocturnum
Citharexylum caudatum
*Elaphrium simaruba**Impatiens balsamina*
Pennisetum clandestinum
"Tora blanca"

BUPRESTIDAE

Agrilus furcillatus Chevr.

Santa Ana

Buddleia sp.

July

May, July, September

Brachys anthrenoides Wtrh.

Paso Ancho

Inga roussoiana

April

May, July, September

Chrysobothris costaricana

Obenberger

San Pedro

Coffea arabica

December

May, July, September

Chrysobothris convexiusculatus

Wtrh.

Rosa sp.

San Rafael de Coronado

March

May, July, September

September to December

Cucurbita pepo
*Eugenia jambos**Ficus* sp.

March

May, July, September

Lius hoscheeki Obenberger

San Pedro

Vernonia brachiatia

April
